The Roth 403(b)

Beginning in 2006, employers can offer a brand-new option to 403(b) plan participants--the ability to make Roth 403(b) contributions. If you're lucky enough to work for an employer who offers this option, Roth contributions could play an important role in maximizing your retirement income.

What is a Roth 403(b)?

A Roth 403(b) is simply a traditional 403(b) plan that accepts Roth 403(b) contributions. Roth 403(b) contributions are made on an after-tax basis, just like Roth IRA contributions. This means there's no up-front tax benefit, but if certain conditions are met, your Roth 403(b) contributions and all accumulated investment earnings on those contributions are free from federal income tax when distributed from the plan. (Beginning in 2006, 401(k) plans can also allow Roth contributions.)

Who can contribute?

Unlike Roth IRAs, where individuals who earn more than a certain dollar amount aren't allowed to contribute, you can make Roth contributions, regardless of your salary level, as soon as you're eligible to participate in the plan.

How much can I contribute?

There's an overall cap on your combined pretax and Roth 403(b) contributions. In 2006, you can contribute up to \$15,000 (\$20,000 if you're age 50 or older*) to a 403(b) plan. You can split your contribution any way you wish. For example, you can make \$8,000 of Roth contributions and \$7,000 of pretax 403(b) contributions. It's up to you.

Roth contributions could play an important role in maximizing your retirement income

But keep in mind that if you also contribute to a 401(k), SIMPLE, SAR-SEP, or another 403(b) plan, your total contributions to all of these plans--both pretax and Roth--can't exceed \$15,000 (plus catch-up contributions) in 2006. It's up to you to make sure you don't exceed these limits if you contribute to plans of more than one employer.

If you also participate in a section 457(b) plan, any pretax contributions you make to the 457(b) plan are in addition to your 403(b) contributions. This means you can contribute up to \$15,000 of pay, Roth or pretax, to the 403(b) plan and an

additional \$15,000 pretax to the 457(b) plan in 2006 (plus catch-up contributions)--a significant savings opportunity. (457(b) plans can't allow Roth contributions.)

Can I also contribute to a Roth IRA?

Yes. Your participation in a Roth 403(b) plan has no impact on your ability to contribute to a Roth IRA. You can contribute to both if you wish (assuming you meet the Roth IRA income limits). You can contribute up to \$4,000 to a Roth IRA in 2006 (\$5,000 if you're age 50 or older).

Should I make pretax or Roth 403(b) contributions?

When you make pretax 403(b) contributions, you don't pay current income taxes on those dollars (which means more take-home pay). But your contributions and investment earnings are fully taxable when you receive a distribution from the plan. In contrast, Roth 403(b) contributions are subject to income taxes up front, but qualified distributions of your contributions and earnings are entirely free from federal income tax.

Which is the better option depends upon your personal situation. If you think you'll be in a similar or higher tax bracket when you retire, Roth 403(b) contributions may be more appealing, since you'll effectively lock in today's lower tax rates. However, if you think you'll be in a lower tax bracket when you retire, pretax 403(b) contributions may be more appropriate. Your investment horizon and projected investment results are also important factors. A financial professional can help you determine which course is best for you.

Are distributions really tax free?

Because your Roth 403(b) contributions are made on an after-tax basis, they're always free from federal income tax when distributed from the plan. But the investment earnings on your Roth contributions are tax free only if you meet the requirements for a "qualified distribution."

In general, a distribution is qualified only if it satisfies both of the following requirements:

- It's made after the end of a five-year waiting period
- The payment is made after you turn 59½, become disabled, or die

The five-year waiting period for qualified distributions starts with the year you make your first Roth contribution to the 403(b) plan. For example, if you make your first Roth contribution to your employer's 403(b) plan in December 2006, then the first year of your five-year waiting period is 2006, and your waiting period ends on December 31, 2010.

But if you change employers and roll over your Roth 403(b) account from your prior employer's plan to your new employer's plan (assuming the new plan accepts Roth rollovers), the five-year waiting period starts instead with the year you made your first contribution to the earlier plan.

If your distribution isn't qualified (for example, you receive a payout before the five-year waiting period has elapsed or because you terminate employment), the portion of your distribution that represents investment earnings on your Roth contributions will be taxable, and subject to a 10% early distribution penalty unless you're 59½ or another exception applies.

You can generally avoid taxation by rolling your distribution over into a Roth IRA or into another employer's Roth 401(k) or 403(b) plan, if that plan accepts Roth rollovers. (State income tax treatment of Roth 403(b) contributions may differ from the federal rules.)

What about employer contributions?

Your employer can match your Roth contributions, your pretax contributions, or both. But your employer contributions are always made on a pretax basis, even if they match your Roth contributions. That is, your employer's contributions, and investment earnings on those contributions, are not taxed until you receive a distribution from the plan.

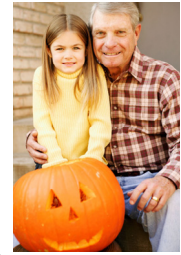

What else do I need to know?

Like pretax 403(b) contributions, your Roth 403(b) contributions and investment earnings can be paid from the plan only after you terminate employment, attain age 59½, become disabled, or die. Your Roth contributions (but not investment earnings) can also be distributed if you incur a hardship.

Unlike Roth IRAs, you must begin taking distributions from a Roth 403(b) plan after you reach age 70½ (or after you retire if later). But this isn't as significant as it might seem, since you can generally roll over your Roth 403(b) dollars into a Roth

IRA if you don't need or want the lifetime distributions.

Employers aren't required to make Roth contributions available in their 403(b) plans. So be sure to ask your employer if they are considering adding this exciting new feature to your 403(b) plan.

Note: Unless extended by Congress, the provisions of the Internal Revenue Code that permit Roth 403(b) contributions will expire at the end of 2010.

	Roth 403(b)	Roth IRA
Maximum contribution (2006)	\$15,000	\$4,000
Age 50 catch-up (2006)*	\$5,000	\$1,000
Who can contribute?	Any eligible employee	Only if under income limit
Age 70½ required distributions?	Yes	No
Potential matching contributions?	Yes	No
Potential loans?	Yes	No
Tax free qualified distributions?	Yes, 5-year waiting period plus either 59½, disability, or death	Same, plus first time homebuyer expenses (up to \$10,000 lifetime)
Investment choices	Limited to plan options	Virtually unlimited
Bankruptcy protection	Unlimited	At least \$1 million (total of all IRAs)

**Special section 403(b) catch-up rules may also apply.*
